INTRODUCTION

Pick n Pay has a long and remarkable history of sustainability and progressive social action, beginning well before it became a fashionable part of corporate life. This may in part have reflected the particular challenges facing South Africa in the early decades of the business. But at its core were the vision and values of Pick n Pay’s founder, Mr Raymond Ackerman, his unshakable belief in the consumer, and his commitment to the principle that doing good is good business.

Pick n Pay remains very active today in each of the five areas of our sustainability strategy. This report highlights some of the work we are doing. It celebrates a number of our successes and shares some of our challenges. We take particular pride in reporting examples where, by working in partnership with individuals or organisations, we have helped to turn ideas into reality, benefiting people, society and the environment.

The sustainability challenge combines local and global issues. Nowhere is this more evident than in southern Africa. Our challenges on public health, poverty, education, social cohesion and the environment are more acute than in many other regions of the world. Our sustainability strategy has these challenges front of mind.

To bring some of our work together, and give it new impetus, we have recently launched our ‘War on Waste’, setting three ambitious targets to be achieved by 2020: a further 20% reduction in energy use per square metre, bringing our total reduction to 50% since 2008; a reduction of 20% in food waste; and 20 new jobs to be created each weekday in South Africa. We call this 20/20/20 by 2020 and have galvanised our whole business behind it.

At the same time, we know that global collaboration in areas such as climate change, deforestation, and food and water security can only succeed if it has real momentum in Africa. We are determined to play an active role in organisations such as the global Consumer Goods Forum, of which our Chairman, Gareth Ackerman, is currently co-chair. Here, as in our local work, partnership holds the key to progress.

We look forward to hearing your comments, contributions and ideas for further action.

David North
Our sustainable living strategy is a core element of the community section of the Pick n Pay steering wheel. The five commitments cut across each segment in support of customers, employees, operations and finance. We report on these commitments in the chapters to follow.

Please refer to the final chapter for information on how we organise sustainability across the business, our reporting structures and governance efforts.

Pick n Pay's approach to sustainability has informed our business plan over the past two years. For example, an important feature of Stage 1 of our recovery has been energy efficiency, which has helped us to reduce cost pressures and improve efficiency.

We see sustainability efforts playing an even greater role in support of our plan: changing the trajectory of Pick n Pay. A commitment to leaner operations will require greater supply chain efficiency, supported by our efforts to reduce waste and energy use, and improve delivery and packaging efficiency.

Sustainability is a part of how we think, innovate and grow. Our customers increasingly expect it and it is becoming embedded in our thinking and actions.
Why it’s important
Healthy food choices are important for good health and wellbeing. Chronic conditions such as cardiovascular disease, obesity, cancer and diabetes are all linked to poor diet and lifestyle. In South Africa, some of these conditions are reaching epidemic proportions. As one of the largest food retailers, we recognise our role in providing access to affordable healthy food, and information that will help customers to make informed choices about what they eat and how they live.

What we do
• We help our customers lead healthy and sustainable lives by providing them with safe, healthy and sustainable products, and information with which to make informed choices.
• We run promotions that make healthier foods more affordable and provide various channels to communicate health- and nutrition-related information.
• We provide opportunities to get active, offer wellness screening tests at our pharmacies, and raise awareness of the importance of a healthy diet and exercise, in maintaining good health and wellbeing.

What we’ve achieved in FY 2015

Offer healthy and sustainable food choices
We offer a wide range of wholesome, nutritious and high-quality food, and are committed to improving the products on offer and the choices available to our customers. Salt reduction in processed food has become mandatory in South Africa and similar requirements on sugar in processed products are expected.

We continue to reduce salt in a range of our products to levels set by government to be achieved by 2016 and 2019. The challenge is to reduce salt and sugar content in products without compromising their safety, taste and quality. To meet our commitment to food quality and safety, Pick n Pay has a robust policy under which all our private label food suppliers are audited.

Empower people through reliable and accessible information
Providing reliable and accessible information is essential in promoting healthy food choices. Our product labelling policy ensures that customers are given accurate information to allow them to make informed buying decisions. Pick n Pay’s registered dietician is available through the company’s toll-free Health Hotline (0800 11 22 88) to answer customer and staff queries relating to various nutrition and food-related issues.

We extend health education to our customers through distributing a range of NutriWise leaflets in stores, providing educational materials in schools, and have a library of nutrition and health-related articles on our website’s Nutrition and Wellness page: www.pnp.co.za/healthcorner

Pick n Pay employs 36 food technologists to ensure that our products comply with all the relevant legislation in terms of quality, content standards and labelling

Encourage active lifestyles
We encourage our customers to lead more active lifestyles by sponsoring and supporting high-profile events.

Pick n Pay hosts the Pick n Pay Women’s Walk, a series of nationwide 5km fun walks to raise funds for PinkDrive, a non-profit company offering free cancer screening and health advice in local communities, and promoting physical fitness. Since 1991 we have been a major sponsor of the annual Cape Town Cycle Tour, the world’s largest timed cycling event, which attracts up to 35 000 participants. Our strategic position in these events is to promote physical fitness and a healthy lifestyle.

Provide in-store services
Our pharmacy division was created to provide our customers with the best possible healthcare. We have 29 Pick n Pay pharmacies nationwide, offering over-the-counter medication, vitamins and supplements, sports nutrition supplements, medical services clinics and a dispensary. Our pharmacies with clinics offer wellness screening and a wide range of medical tests including: cholesterol testing, glucose testing, blood pressure, BMI, weight management, audiometry, ear irrigation and wound care, pregnancy testing, antenatal consultations, breast examinations, pap smear (selective clinics) and baby vaccinations (free vaccinations in the Western Cape for government patients), family planning (free in the Western Cape for government patients), HIV testing and counselling.

Clinics can also assist with injections and pathology collections, peak flow assessments, rapid blood group testing and more.

Making healthy products more accessible
Some customers believe that fruits, vegetables and fish are more expensive than processed meals and snacks. To counter this, and to improve access to healthier products, we offer promotions, such as our weekly ‘Super6’ – six high-quality fruit and vegetable staples at competitive prices. Our smart shopper loyalty programme seeks to encourage customers to make healthier choices and through our partnership with the National Department of Health, we offer wellness screening at Pick n Pay pharmacies with clinics and a dispensary. Our pharmacy division was created to provide our customers with the best possible healthcare. We have 29 Pick n Pay pharmacies nationwide, offering over-the-counter medication, vitamins and supplements, sports nutrition supplements, medical services clinics and a dispensary. Our pharmacies with clinics offer wellness screening and a wide range of medical tests including: cholesterol testing, glucose testing, blood pressure, BMI, weight management, audiometry, ear irrigation and wound care, pregnancy testing, antenatal consultations, breast examinations, pap smear (selective clinics) and baby vaccinations (free vaccinations in the Western Cape for government patients), family planning (free in the Western Cape for government patients), HIV testing and counselling.

Clinics can also assist with injections and pathology collections, peak flow assessments, rapid blood group testing and more.

Community healthcare:
Our pharmacy staff members’ community-outreach activities include:

- Free glucose and blood-pressure tests at the PinkDrive truck at Pick n Pay Women’s Walks
- Free in-store health screenings throughout the year
- Visiting government-funded old age homes to offer free screening services, as well as to donate cakes and small gifts

Educational material:
As part of our School Club initiative we encourage healthy eating by educating learners about the importance of eating breakfast and why a healthy balanced lunch box is important for our bodies.

- This past year we printed and distributed posters (see below) to about 2 300 primary schools.

Addressing obesity:
We engage with the national Department of Health to help combat obesity in South Africa. Initiatives include responsible marketing communications for foods and beverages to children, contributing to an industry-wide healthy eating education campaign and supporting local research to determine the food causes of obesity in South Africa.
SUPPORTING LOCAL AND ETHICAL SUPPLIERS

Our supply chain sustainability work focuses on two commitments: to support local, small-scale, black- and women-empowered businesses, and to promote sustainable practices throughout our supplier network.

Why it’s important

Local and diverse suppliers
Small business development in the retail sector, particularly of black- and women-owned businesses, is essential to grow our economy, drive employment and empower individuals. A diverse supplier base is important in ensuring we have a broad variety of products to meet customer needs and a strong pipeline of innovation.

A locally focused supply base is an advantage in addressing long-term food security, environmental and social challenges.

We measure our contribution to these objectives by tracking relevant key performance indicators year-on-year (see page 15).

The long-term viability of our operations depends on the sustainability of our resource base. We recognise the importance of promoting resilience throughout our value chain, and supporting our suppliers to meet effective standards. Ensuring strict product quality control also builds trust with our customers.

What we do

• We recognise that many small suppliers have challenges in accessing funding, growing scale and achieving a viable business – particularly if they are new to the industry. We have taken a leading role in mentoring, encouraging and enabling small-scale entrepreneurs to become sustainable suppliers to the retail industry and have sought to address the inequalities of the past by focusing on broad-based black economic empowerment (BBBEE).

• We support producers who proactively manage animal welfare and environmental issues, and we encourage initiatives that promote improvements to animal welfare.

• We are partnering with our suppliers on various sustainability initiatives, including packaging reduction and innovation, sustainable product development, and sustainable and transparent sourcing.

Pick n Pay operates a policy of giving preference to local suppliers whenever possible.
## Local and Diverse

### Increase local sourcing
- A total of 94% of our fresh-food products are procured from South African suppliers.
- We procured products worth R40 billion from South African suppliers.
- Through co-operation with the Ackerman Pick n Pay Enterprise Development Fund, 25 businesses and community enterprises benefited from the enterprise development (ED) programme, of which 12 are now suppliers.

### Promote supplier diversity
- Preferential procurement score under BBBEE scorecard increased by 26.39%.
- Tripled expenditure on black women-owned businesses and quadrupled our spend on SMMEs.
- Expenditure on BBBEE business increased by over 39.2% reaching R33 billion.

### Support ethical and sustainable initiatives
- Leading change in the industry by enforcing ambitious commitments to improve the welfare of pigs in our supply chain.
- Sales of Fairtrade coffee doubled.
- Sales of free range products increased by 8.3%.
- Rebranded our ‘green household range’ of cleaning products.

### Source sustainable seafood
- 45% of our seafood products by species and 87% of our products by sales meet our seafood sustainability targets, based only on species assessed by WWF South African Sustainable Seafood Initiative (WFF-SASSI).
- Developing clear sustainability labelling of all our seafood products.

### Work with suppliers to meet environmental, social, and governance (ESG) standards
- 63% of Pick n Pay fresh produce suppliers are GLOBALG.A.P (good agricultural practice) certified.
- We partnered with the Consumer Goods Council of South Africa (CGCSA) and a group of our suppliers to launch a pilot programme for the implementation of the Global Social Compliance Programme in South Africa.
- We partnered with the National Business Initiative on their Private Sector Energy Efficiency programme and introduced more than 300 suppliers to the potential energy reduction and savings of the programme.

## Sustainable and Ethical

### Sourcing seafood sustainably
Pick n Pay continues to play a leading role among African retailers in the path towards sustainable seafood and providing customers with the best environmental choices. We drive change throughout our seafood supply chain to mitigate risks of over-fishing. We are a longstanding core funder and sustainable seafood partner of WWF-SA (see table opposite and page 14). We are on track to meet our commitment to only sell 100% sustainably sourced seafood products by December 2015. We will also ensure that by the end of 2015, all our seafood products are traceable to their origins and are labelled with their common name, scientific name, origin and method of catch.

### Increasing local sourcing
By developing strong, trusting and enduring partnerships with local suppliers through communication, collaboration and common purpose, we are able to give our customers what they want: global best quality but through locally sourced products.

We explore innovative ways of supporting local businesses while retaining our high standards of quality and value for money.

Our small business mentorship and enterprise development initiatives help local businesses to become sustainable suppliers for the whole retail industry.

### Promoting supplier diversity
We promote transformation throughout our supplier base through preferential procurement and by assisting suppliers to achieve compliance with standards. Our strategic approach is overseen by our Transformation Director and administered by our Transformation Office, in conjunction with the Ackerman Pick n Pay Foundation. Our preferential procurement strategy directly targets black- and women-owned small businesses and we have made significant progress across our key performance indicators (see page 15). We will continue to work hard to engage with and provide training to our buying divisions on BBBEE.

### Supporting small businesses
Through our Enterprise Development Programme, and the Enterprise Development Fund administered through the Ackerman Pick n Pay Foundation, we are building and sourcing from an increasing number of small businesses. This hub of entrepreneurship is becoming a pipeline of new and enterprising products for our shelves, and a lever to drive our product innovation.

Building a resilient supplier network enables us to help existing suppliers address social and environmental risks, deepen relationships within our supplier network, and comply with empowerment requirements.

### Sustainable and ethical

#### Supporting ethical initiatives
Customers participating in our Smart Shopper loyalty programme have given us insight into a growing public awareness of social, environmental and ethical issues. As customer preferences change, there are opportunities for new products and new enterprises.

To offer consumers sustainable alternatives, we provide a range of organic, free range and Fairtrade products. During this year we set a new benchmark among the biggest food retailers in South Africa with commitments to accelerate progress on the welfare of pigs in South Africa. From 31 December 2015, all fresh pork sold at PnP stores must come from farms using group housing for pregnant sows during the gestation period – allowing them to socialise and move much more freely. By 31 December 2016, this commitment will be extended to cover all processed pork products sold by Pick n Pay.

We are strengthening our own audit process to reflect the new requirements, and are working closely with our suppliers to ensure they are met.
Supporting small suppliers

Tropical Mushrooms farm in Gauteng used a loan of R3 million from Pick n Pay in 2013 to grow its capacity, increasing its sales revenue from over R18 million in 2012 to over R20 million this year. The farm employs 120 people and supplies Pick n Pay with 1 500 crates of mushrooms weekly.

In the Eastern Cape, the community of Cwebeni has developed a SAFSIS-certified honey bottling plant, with 240 active hives in the local forest, and eight fully-trained beekeepers, all funded by the Ackerman Pick n Pay Foundation.

Biodiversity and wine

Pick n Pay sold R70 million worth of the Biodiversity and Wine Initiative (BWI) members’ wines in the past financial year, a 13% increase from the previous year.

Our supply chain

We have a substantial impact on the South African economy through our supply chain, with R40 billion in direct procurement, providing employment for approximately 48 700 people.
Why it’s important
Reducing our environmental footprint helps us manage risk and achieve cost reductions. The rising costs and environmental impacts associated with electricity and fuel use, as well as sending waste to landfill, are key drivers in this area.

Given the pressure on natural resources, this focus also benefits the environment and broader society. Severe climatic events, increasing energy costs and water supply limitations are impacting producers and could, in time, threaten global food systems. We take our responsibility seriously and work with others in tackling these risks.

What we do
• As a leading retailer, we are committed to reducing our impact on the environment and encouraging our suppliers and others to do so as well.
• We have identified our key environmental impacts and our efforts are guided by a climate change and food security strategy.
• Our approach focuses on improving energy efficiency and reducing our carbon footprint, reducing the amount of waste we produce, recycling as much as possible, and being water-wise.
• We have improved our environmental data management (see page 33 for our performance), which equips us to better respond to our environmental reporting obligations. Greater centralisation of our business is improving our operational efficiency in this and other areas.

Reduce waste and divert waste away from landfill

Our three-tiered approach to managing waste is to reduce waste generation, divert waste from landfill and increase consumer recycling. Finding cost-effective solutions for reducing levels of organic waste is a key challenge.

Any food that has passed its sell-by date, but not its expiry date, is donated to FoodBank SA. This year we conducted trials including processing food waste into vermicompost, and converting fat and oil from our stores into biofuel.

We also provide collection points for consumers wishing to recycle light bulbs, batteries, plastic bags and ink cartridges, and we continue to introduce recycling initiatives, many of which create opportunities for employment.

We achieved a 4% absolute emissions decrease in our refrigerant gas leakage against a 2013 base

Reduce packaging

Retailers can play an important role in minimising waste by reducing the amount of packaging that comes with products.

The challenge is to reduce packaging without compromising the safety and quality of products. We have more control over the packaging of our own brand products, so this is where we are focusing our efforts. We are developing our packaging database and a new packaging strategy. We provide clear on-pack information to customers on the recyclability of packaging. Another challenge is sourcing affordable recyclable packaging that will not transfer the cost to our customer.

We have continued our campaign to provide customers with reusable bags through innovative enterprise development partnerships (see page 20 and page 29). Our plastic bags contain at least 30% recycled material.

Improve energy efficiency and reduce carbon emissions

Electricity usage accounts for approximately 82% of our total carbon footprint.

The current disruption in electricity supply in South Africa and increasing prices underlines the importance of reducing our electricity use.

Since our stores account for more than 90% of our electricity usage, our energy reduction strategy centres on implementing innovative technologies in new stores and retrofitting existing stores in the key areas of refrigeration, lighting and air-conditioning. New stores opened over the past year are up to 44% more energy efficient than stores opened in 2010.

Our climate change strategy has been acknowledged both locally and internationally (see opposite page 20 and page 29).

We support the activities of the Carbon Disclosure Project (CDP) and have voluntarily participated in its climate change assessment process since 2007 and its water assessment since 2012.

Be water wise

South Africa is a water-scarce country and water security is an increasing social and business risk. As a responsible retailer we have an obligation to reduce our water footprint, as well as raise awareness amongst our customers and suppliers regarding the importance of using water responsibly.

Our direct water footprint is limited. Our six distribution centres account for 12% of our water footprint and have been the focus of our water efficiency measures.

In FY 2015 we consumed an estimated 1 316 megalitres of water at stores and had a water intensity of 1.11kl per square metre. In FY 2014 we had consumed 1 133 megalitre and then the water intensity was 1.19kl per square metre.

We support the activities of the Carbon Disclosure Project (CDP) and have voluntarily participated in its climate change assessment process since 2007 and its water assessment since 2012.
As a leading retailer, we are committed to reducing our impact on the environment and encouraging our suppliers and others to do the same.

Minimising light levels:
Using key-switches in stores after hours saves 75–80% of lighting energy consumption.

Fuel savings:
Our growing online shopping business uses tuk-tuks instead of trucks to make deliveries, saving 15% on fuel usage despite a 30% increase in mileage and 27% increase in orders.

Diverting waste from landfill:
In the Eastern Cape, we have reduced our landfill waste volumes by 20% by composting fruit and vegetable waste (230 tonnes were composted in the 2015 financial year).

Recycling in-house:
The majority of our trolleys contain up to 30% recycled content. All recyclable material from old, damaged and scrapped trolleys is removed and reused. We also recycled 3.3 million hangers in the 2015 financial year.

Refrigeration:
All our new and refurbished stores are equipped with hybrid refrigeration systems that use carbon dioxide alongside gases with lower potential emissions than hydrofluorocarbons. Our six distribution centres use ammonia as a natural alternative coolant.

Recycling enterprise:
The Phahama Project provides PnP-branded, pedal-powered vehicles to previously disadvantaged collectors of recyclable waste materials.

As the core funder of the WWF’s Sustainable Fisheries Programme, Pick n Pay has enabled more than 1000 fishers to be trained in responsible fishing practices and more than one million WWF-SASSI pocket cards to be given to South African consumers, helping them make more sustainable seafood choices.

We provide a range of re-usable bags to assist customers in using less plastic bags.

As a leading retailer, we are committed to stocking only sustainably sourced seafood by 2016.

Pick n Pay is committed to stocking only sustainably sourced seafood by 2016.
EMPLOYEE OPPORTUNITY AND DIVERSITY

Why it’s important
Creating jobs, building skills and accelerating opportunity and empowerment are essential to the wellbeing of the nation and to reducing poverty and inequality. By growing our workforce and improving our employees’ skills and employment equity profile, our business makes a valuable contribution to our economy and social cohesion.

Employees who are satisfied with their work are less likely to leave – and in an industry where staff turnover is high, it is a competitive advantage to be an employer of choice.

What we do
• We provide good jobs, effective training and development, competitive pay, good working conditions and an opportunity to progress.
• We seek to ensure that the composition of our employee base at all levels to accurately reflect wider society.
• We operate a robust career-development framework to help our employees to meet their career goals.

What we’ve achieved in FY 2015

What we aim for

Promote diversity, transformation and equity
Develop and retain skills
Listen to and engage with our employees

What we’ve achieved in FY 2015

BBBEE rating improved from a level 6 to a level 4
Improved representation of designated groups in middle management
BEE skills development score increased by 16%
R107 million spent on employee skills training and bursaries
High success rates in our Graduate Programme, Corporate Academy and leadership development initiatives
Permanent employee turnover of 19.3% (industry average is 20–25%)
Commitment to a two-way internal communication
We lost no days to protected strikes during the review period
Develop and retain skills
A skilled workforce is crucial to a successful retail business. Good skills mean better products, a more efficient supply chain and store operations, and better customer service. Staff who develop their skills are able to advance more quickly through the organisation. This makes the business stronger, makes individuals more likely to stay with the company and contributes to social mobility. For all these reasons we attach a high priority to training and developing skills in our people.

Our leadership development programmes, accredited by formal tertiary institutions in South Africa, have been very successful in providing the business with future leaders. Our Graduate Programme is aimed at developing graduates to join our leadership pipeline, while our Corporate Academy seeks to fast-track the development of a pool of managers for our stores.

Promote employee health and wellness
Promoting health and wellness has a positive influence on our employees’ wellbeing and productivity, at work and beyond. We comply with the Occupational Health and Safety (OHS) Act. All our employees receive health and safety training as part of their induction, and specific training is provided where required. We employ OHS practitioners who co-ordinate all health and safety activities in the regions. They provide health advice and referrals to health centres for tests, treatments and check-ups. They also assist regions with health-related tasks such as monitoring health hazards or visiting sick employees.

Our longstanding HIV/AIDS programme includes the provision of anti-retrovirals to HIV-positive employees and taking care of orphans of our employees.

Listening to and engaging with our employees
Engaging with our employees helps to build knowledge of the company’s plans and activities, and helps our staff communicate knowledgeably and effectively with our customers. Good internal communications also builds trust and loyalty among our team members and enables us to better respond to our employees’ concerns.

Our main channels of engagement include surveys, monthly publications, and formal and informal staff interaction. Common issues discussed with our employees include remuneration, training, career development, company performance, and BBBEE and transformation.

Our regional teams have a corporate social investment (CSI) budget with which to participate in community donations and fundraising activities. This has enabled staff volunteers to respond to local needs and assist with community support and development.

We offer over 330 training programmes to employees, ranging from basic literacy and numeracy through to computer-based training and management and leadership programmes.
Why it’s important

We have stores in the heart of many communities, and seek to play a positive role wherever we have a presence. This can take various forms, including supporting local charities, volunteering, donating goods or services and helping local people during crises or emergencies.

Being part of the community helps to build and maintain trust and loyalty in our brand. More broadly, it contributes to social capital and progress on the social and economic transformation of the country.

What we do

- For us, social responsibility has always encompassed a broad range of activities, from championing the interests of the consumer through to working at a local level to uplift communities and individuals.
- We seek to ensure that at least 5% of our after-tax profits are invested in social and community initiatives (see page 34 for a breakdown of our CSR investment).
- We seek to strike a balance between supporting smaller local initiatives, and larger wider-impact initiatives that can benefit from our scale and leverage.
- Our principal partnerships are with non-governmental organisations and service providers, government departments, and companies that invest in the community development initiatives.

What we’ve achieved in FY 2015

- Make philanthropy work
  - A total CSI expenditure of R44.6 million* (5.2% of post-tax profit)
  - Our Smart Shopper loyalty programme has generated R2.2 million worth of points which has been donated to charity by our customers

- Build community food gardens
  - Established 243 community gardens to increase community food security

- Support educational projects
  - Increased the number of schools in our School Club from 2 500 in the 2013 financial year to 3 025
  - Every year 5 000 previously disadvantaged children visit national parks through our Kids in Parks programme
  - Contributed R1.3 million in bursaries

- Donate to organisations
  - Donated food to the value of R28 million to FoodBank
  - Donated clothing to the value of R1.8 million to Clothing Bank

*This figure includes funds directed into enterprise development through the Enterprise Development Fund
Make philanthropy work

In all our investments, we aim to uphold the principle of “doing good is doing good business”. We strive to ensure that we respond effectively to local as well as national needs, by empowering our stores to engage effectively with their local stakeholders. Our stores in disadvantaged areas provide jobs and opportunities where they are most needed.

The Ackerman Pick n Pay Foundation (the Foundation) was founded in 1997 as a fund for philanthropic purposes. Complementing Pick n Pay initiatives, the Foundation supports community organisations that have programmes or activities in place that generate income to make the community self-reliant and financially independent (see ‘supporting small businesses’ on page 13).

Through our Smart Shopper loyalty programme, our customers are able to convert Smart Shopper points into a donation to a charity.

Build community food gardens

Since 2013 the Ackerman Pick n Pay Foundation has supported community gardening as part of its commitment to ensuring food security and creating jobs. The Foundation partners with Food Basket for Africa and other organisations across the country to establish rural and urban food gardens as well as converting a few of them into training gardens. These projects both feed communities and allow for the sale of surplus produce. Between 2013 and 2015 the number of community food gardens established more than doubled from 100 to 243 (40% are in the Eastern Cape), and more than 60 home gardens were started.

Support educational projects

The Pick n Pay School Club, now in its 12th year, is one of the most influential and dynamic public-private educational initiatives in South Africa. The Club makes much-needed educational resources available through private sector funding. It reaches 3 025 schools (725 high schools and 2 300 primary schools), comprising more than 5.7 million educators, learners, parents and guardians. The free educational material supplied by the School Club – books, posters, overview brochures, recognition stickers, certificates, and mirror decals – is specific to learners’ grades, aligned to the curriculum, and written by experts. The material also addresses nutrition, health and sustainability topics.

The number of schools included in the School Club initiative increased from 2 500 in 2013 to 3 025 in 2015

Donating to organisations that address challenges at scale

We are the biggest retail donor to the food security agency, FoodBank SA. Through our partnership, FoodBank has been able to provide food to more than 600 agencies across the country, which in turn feed over 40 000 people a day. Pick n Pay Clothing donates its excess clothing to the Clothing Bank’s development programme, which trains and supports black women in running small informal clothing retail businesses in their communities. The Clothing Bank has helped over 275 women to start small businesses in the last three years.

Township® social enterprise: For over a decade we have been supporting the Township® social enterprise, which trains disadvantaged women from Khayelitsha and Manenberg to run their own Fairtrade-certified sewing co-operatives sustainably. The women make reusable bags from non-genetically modified cotton. Township® supplies our ‘Say no to plastic bags’ campaign designer bags. Thanks to customers’ support more than 500 000 have been manufactured for Pick n Pay since 2009.

Dignity Dreams: Pick n Pay sponsors Dignity Dreams, which distributes packs of essential sanitary hygiene items to disadvantaged girls around the country who can’t afford to buy sanitary towels. This is a major help in reducing school absence among these girls.

Beyond our borders

Our support for communities also extends to our stores in other African countries.

In Zambia every store adopts a school in their area and makes an annual capital contribution to the improvement of the school. Funds are allocated to activities such as the repair of school roofs and the provision of fencing around a school.

In the year under review, children’s homes such as the Lubasi and Lushomo Homes in Zambia were supplied with groceries to support them for several months.

Water pumps and boreholes were also donated to two schools to provide water. The schools have an average of 1 800 learners each. At another school a library was installed.

In Lusaka’s Mtendere township a full computer lab was donated to the Mahatma Gandhi Primary school.

From top left clockwise: During the year we donated 4 000 pairs of school shoes to children in need; we donated a library to the Merrydale school in Mitchells Plain; our Kids in Parks partnership with government allowed 5 000 children to participate in an educational programme in national parks throughout South Africa.
In July 2015, Pick n Pay announced a broad new campaign to combat waste in all its forms. Ten million tonnes of food is wasted each year in South Africa, a country in which millions of people still go hungry. Too much energy is wasted in a country which is suffering from a constrained power supply and frequent power outages, and which is committed to action on climate change.

Too much human talent is also wasted, with over half of 15 to 24 year-olds in South Africa are unemployed.

As this report has set out, Pick n Pay has a good track record in these areas. But we are determined to do more and have therefore set out three new targets:

- Between now and 2020 we will cut our energy use per square metre by a further 20%, adding up to a 50% reduction since 2008.
- In terms of tackling climate change, and including our work on climate-friendly refrigeration, we will aim to reduce CO2 emissions by 25% by 2020.
- We will create 20 new jobs in South Africa every working weekday, employing many previously unemployed young people. This will add up to around 5,000 new jobs per year as we expand our ability to serve customers across the country.
- We will cut food waste by 20% by 2020, and set a goal of zero food waste to landfill. In addition to deepening our partnership with FoodBank, we will find new ways to make productive use of food waste. As our business becomes more efficient and effective we will reduce the amount of food waste we produce in the first place.

We call this programme 20/20/20 by 2020, encapsulating our ambitious targets to wage a war on waste in Pick n Pay. We are busy galvanising everyone in our business – and our partners and stakeholders outside the business – to get behind our ambition and our targets.
识别关键问题

我们通过结构化内部风险管理过程来识别可持续性问题，该过程考虑了利益相关者的所有利益和担忧。这些材料问题被划分为五个关注领域（见第4页），并由我们的可持续性指导委员会审查。这些关注领域提供了我们战略和信息的框架，我们为我们的业务 Sustainability Governance Structure

识别和治理承诺

我们遵守所有相关法规和规定，包括公司治理的金科玉律。我们还遵守JSE责任投资指数的要求。我们的GRI-G4内容索引可在picknpay.co.za/sustainability上找到。

Pick n Pay团队的行动符合“做好事就是好生意”的原则

我们继续改进数据，以便我们的可持续性报告（SLR）2015能够提供一个全面的视图，讲述我们如何应对社会和环境挑战。我们的目标是提供对我们的可持续性目标和我们非财务数据的改进管理。

组织业务的可持续性

Pick n Pay团队的行动符合“做好事就是好生意”的原则，通过政策和实践。良好的治理是本原则的重要组成部分，它使我们能够将社会和环境问题整合到风险管理中。

合并非财务数据

我们为每个可持续性目标分配了绩效指标，以便我们改进非财务数据管理。我们已经独立审计了BBBEE等级卡和碳足迹数据。进一步的数据和年度报告可以在我们的GRI报告中找到。
